

# Auto-Intellect 5.2

## Release Notes

**22.04.2016 AxxonSoft releases version 5.2 of the Auto-Intellect license plate recognition and road safety solution. This version is intended for use with version 4.10.0 of the Intellect PSIM.**

## New features and improvements

1. IntLab-Railcars module has been added for railcar ID recognition.
2. Railcar ID recognition feature has been added to Carmen recognition module.
3. Parking violation detection module has been added.
4. Traffic violations detection module can now operate with VIT and Carmen recognition modules.
5. VIT and Carmen recognition modules have been updated.
6. Utility for active patterns configuration of VIT module has been implemented for easier configuration of patterns in VIT recognition module.
7. Utility for active patterns configuration of Auto-Uragan module has been implemented for easier configuration of patterns in Auto-Uragan module.
8. Event with speed of the vehicle has been added to the information-gathering subsystem.

## Fixes

1. Incorrect display of recognized license plates for Arab countries has been fixed.
2. Issue related to Auto-Intellect's handling large databases has been fixed.

## Note

Carmen recognition algorithms are to be installed individually – find the installers at <http://www.axxonsoft.com/resources/downloads.php> in **Auto-Intellect recognition engines** section.
