

Release notes for ACFA Intellect 6.2

25 January 2017. Integration modules for Access Control, Fire and Intrusion Alarm, and Perimeter Security systems

For information about the system and supported equipment, refer [here](#).

New integrations

- **ZK Teco ACS.** C3 Series access controllers are supported. The equipment can be configured, controlled and monitored in the Intellect software.
- **Unicard U700 ACS.** The integration allows to configure, control and monitor events from U700 controller by Unicard.
- **ADPRO PRO E-Series PID.** Passive-Infrared Detectors by Xtralis. The new integration module is designed to receive alarms from any ADPRO PRO E-Series detectors.

New features and improvements

Software modules

- **Intellect Web Reports Subsystem.** New reports are added:
 - “User status report” displays data on locked and disabled users, and on expired access cards.
 - “Last access with long time not used ID” displays the last access points for cards and fingerprints that were not used for a specified period (15 days by default).
- **BACnet Wrapper:** all types of devices are supported including MultiStateInput, MultiStateOutput, and MultiStateValue.
- **SNMP Wrapper:** SNMP v.1 & v.2 are now supported.
- **OPC wrapper:** an event for Server stop is added.
- **The “Users import” module:** added feature for importing departments with linked users. Some minor bugs are fixed.

Access Control systems

- **Galaxy Dimension v.2.** Polish language for the panel is supported, new events and states are added. Some minor bugs are fixed.
- **Castle.** Operation logic of the “Valid till” field is changed: now user can have access on the last day of the card validity period (optionally). Some minor bugs are fixed.

Fixes

Minor bugs are fixed in the software modules (Access Manager, Event Manager, Time&Attendance), the biometric ACS modules (Nitgen, Suprema, BioSmart), and the combined ACS/FSA module (Apollo SDK v.2).

Release features

The version 6.2 of ACFA integration modules includes all new integrations and fixes of the previous version.

ACFA 6.2 is compatible with **Intellect 4.10.2** version. For more information about the versions compatibility, refer [here](#).
